

Mattia Giovannini

MSc Student in Artificial Intelligence | BSc in Computer Engineering

✉ mattia.giovannini6@studio.unibo.it • github.com/frigori

Profile

Computer Engineering graduate from the University of Bologna with a strong focus on artificial intelligence, machine learning, and data analysis, admitted to the MSc in Artificial Intelligence at the same university. My undergraduate studies gave me solid foundations in algorithms, statistics, and software engineering, which I applied in a research context during an Erasmus semester in France. I am motivated by the challenge of designing intelligent systems to solve real-world problems and am looking forward to deepening my expertise during my Master's degree.

Education

MSc in Artificial Intelligence

2026 – 2028 (Admitted)

University of Bologna

Admitted to the two-year Master's degree programme starting A.Y. 2026/2027.

BSc in Computer Engineering

2021 – July 2026

University of Bologna

Final Grade: 94/110

- Relevant courses: Mathematical Analysis, Linear Algebra & Geometry, Applied Mathematics (Probability & Statistics), Fundamentals of Computer Science, Operating Systems, Computer Networks, Information Systems, Software Engineering, Web Technologies, Computer Architecture
- **Thesis:** *Autism Spectrum Disorder Detection via Eye Tracking Data using Machine Learning* applying classification and signal analysis techniques to clinical eye-tracking recordings for ASD screening support

Scientific High School Diploma

2016 – 2021

Liceo Augusto Righi, Bologna

Erasmus Study Project

Erasmus Study Experience

2025

Université de Tours, France

- Developed a project on **machine learning for autism spectrum disorder (ASD) analysis**
- Applied classification and feature extraction techniques to eye-tracking data
- Gained experience working in an international academic environment
- Strengthened skills in data analysis, Python, and scientific methodology

Project Experience

BOOM GEN AI Challenge 2026 VEM Sistemi

2026

GenAI Project Team

- Collaborated on the development of a **GenAI-based assistant** for automated tender analysis, supporting the **GO/NO-GO** evaluation process.
- Designed and implemented a **Python scoring module** to assess alignment between tender requirements and company capabilities.
- Experimented with **prompt engineering** techniques and **Azure OpenAI** services for requirement extraction, classification and enrichment.
- Contributed to the analysis of a **document parsing pipeline** for normalizing unstructured tender documents.

Technical Skills

Programming Languages: C, Java, Python, JavaScript, HTML/CSS, SQL, Bash

Machine Learning & Data: scikit-learn, NumPy, pandas, Matplotlib, Jupyter Notebook

Systems & Networking: Linux, TCP/IP, socket programming, relational databases

Development Tools: Git, L^AT_EX, MATLAB, Docker & Podman usage

Areas of Interest: Machine Learning, Data Analysis, Containerization, System Automation

Other Experience

Student Webmaster & Editor

2020 – 2021

Liceo Augusto Righi, Bologna

- Designed and managed the school's student platforms (*Righi Network* and *Il Sottobanco*), supporting digital interaction and the school newspaper's online presence.
- Developed skills in web technologies, content management, and team collaboration.

Volunteer Summer Camp Educator

2016 – 2020

Estate Ragazzi, Bologna

Group management, teamwork, communication, and responsibility in educational activities

Languages

Italian Native

English C1

Duolingo English Test: 130/160 (C1) û CLA Certification C1, University of Bologna û Cambridge First Certificate B2 (178/190)

French B1/B2

CLA Certification B1, University of Bologna û B2/C1 courses completed at Université de Tours
